

AntiDUSTTAPE®
The original by Multifoil

Clean and clear ***Multiwall sheets?***

Polycarbonate multiwall sheet is an excellent material to use in glazing systems. It offers a light construction, is very strong and durable.

As a result of the polycarbonate being permeable, the only real point of attention is the ongoing condensation in the multiwall. This will spoil the clarity and thermal insulation. Your sheet will turn green and filthy over time.

Multifoil has invented AntiDUST® tape to take this worry away. It's the only system that ensures the clarity of your polycarbonate sheets from day 1 up to 10 years!

*Six clear reasons to use **AntiDUST[®] tape by Multifoil***

All AntiDUST[®] tapes by Multifoil have been engineered to accomplish one goal: to keep your polycarbonate sheet clean and clear. This way you can enjoy all the benefits that a polycarbonate multiwall system has to offer.

Condensation

The high end non-woven has been specially treated to make sure that condensation is gently guided outside. This way we ensure excellent draining.

Adhesive

Coated with a strong and durable adhesive, with outdoor resistance. Easy to apply and reliable. Engineered for polycarbonate application.

Dust, algae and fungi

The filter gives perfect protection to filth and dirt, even in very small particles. Fungi, algae and insects stand no chance.

Contraction and Expansion

All multiwall sheets expand and contract due to its material qualities. All AntiDUST[®] tapes have been engineered to grow and shrink with the sheet. No more tearing or breaking of the tape.

Ventilation

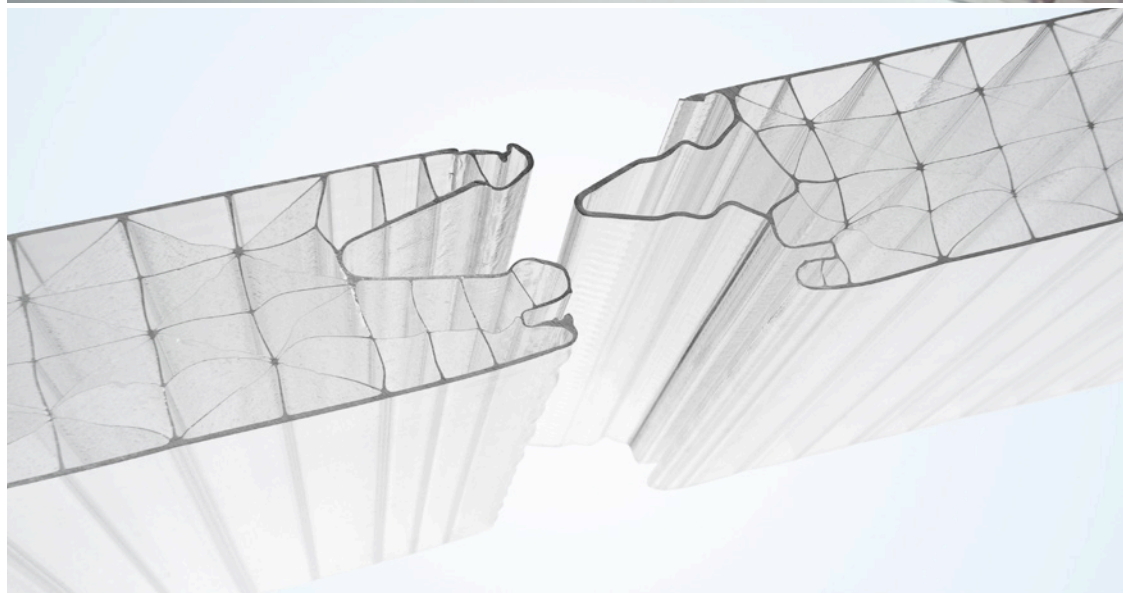

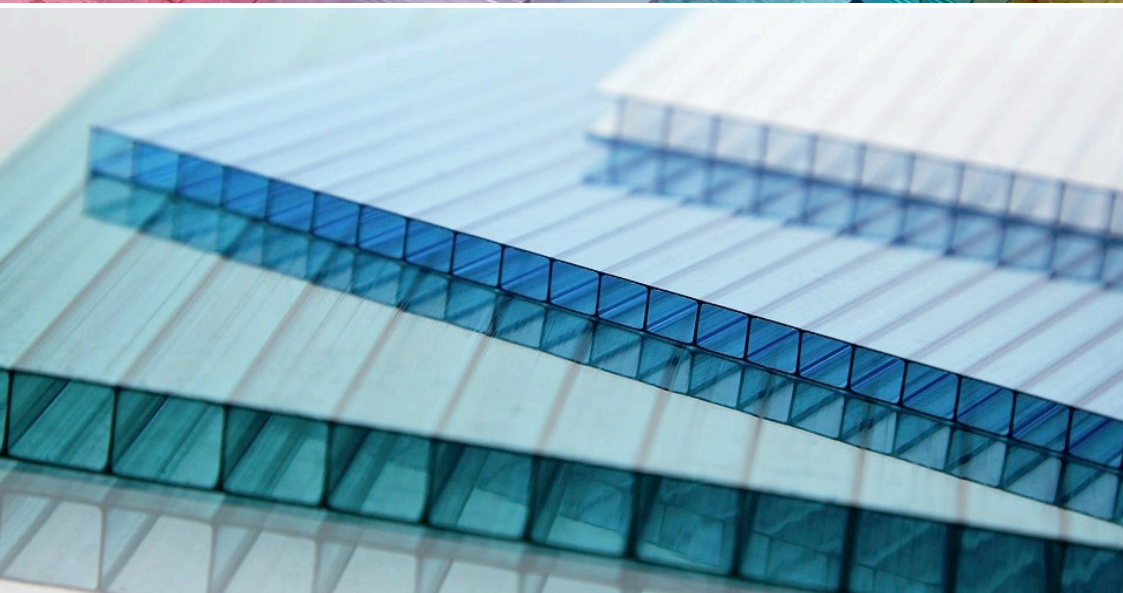

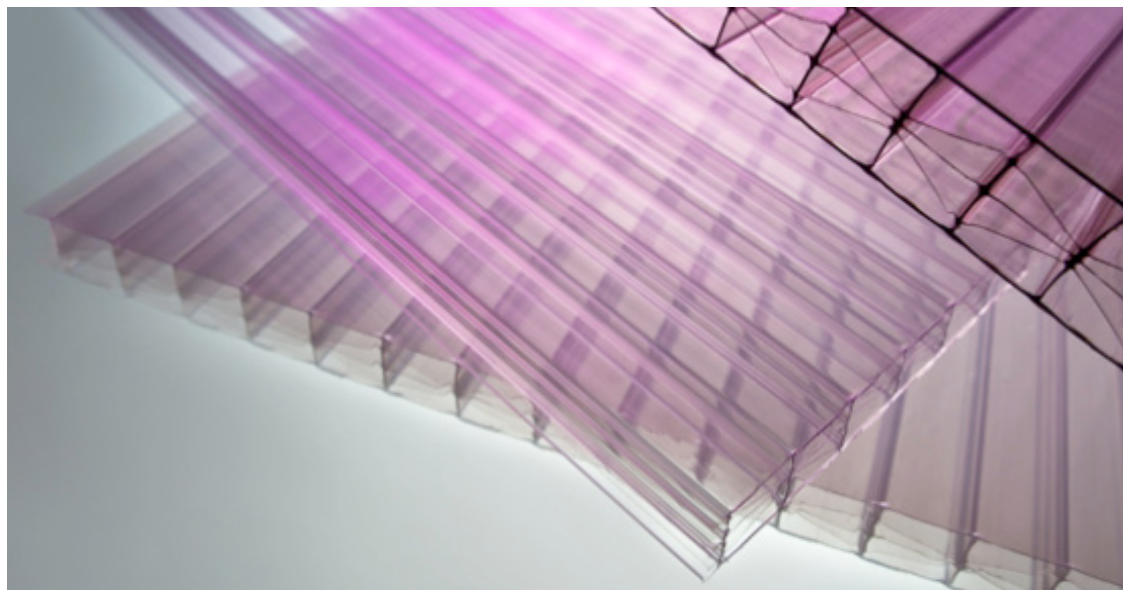

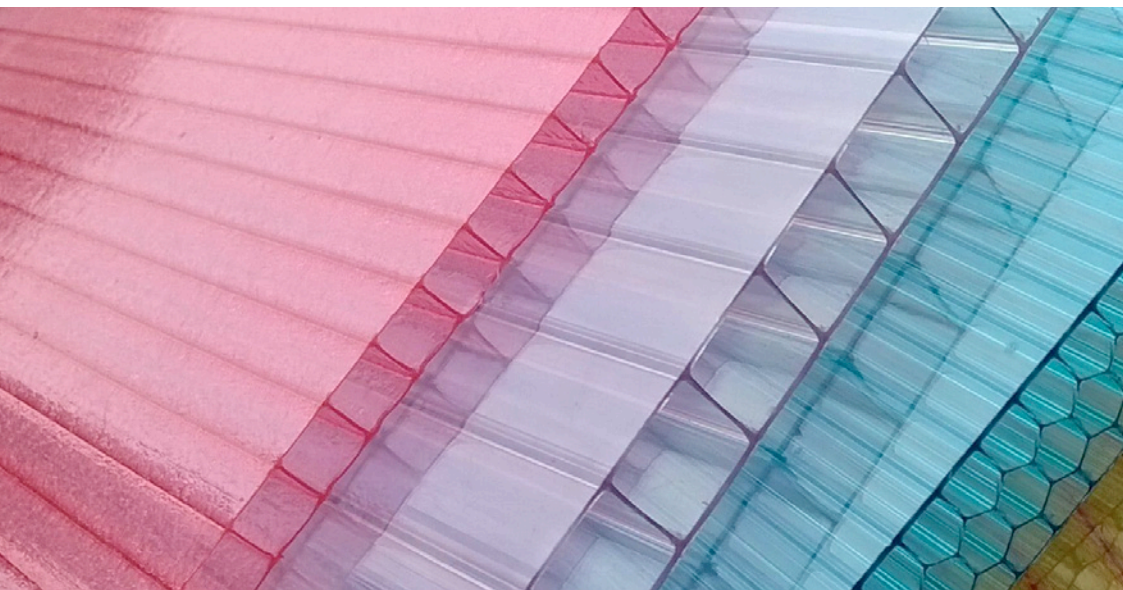

Too much or too little ventilation, both isn't good for the life time of the sheet. Our tape system provides the sufficient amount of ventilation.

Non-woven

Our specially treated high quality non-woven keeps particles >25µm out of the multiwall sheet and is anti-bacterial. Perfect protection.

Polycarbonate | Multiwall sheets

For every multiwall sheet we have a solution

AD3500 | Breather tape

After extensive selecting, engineering and testing, we are proud to introduce our latest edition in the range of our AntiDUST® tapes: the AD3500.

AD4500 | Breather tape

The AD4500 has been given an aesthetic make-over and some of the technical features have been developed in order to stay ahead of our (international) customer needs.

AD4500 | Customizable breather tape

We are also able to customize our AD4500 series with your logo and/or brand name.

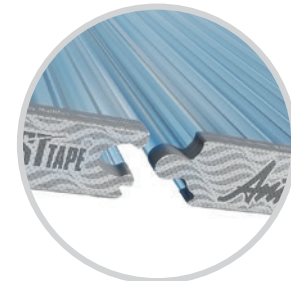

AD3400 | Breather tape

Our AD3400 series is successfully used in industrial and consumer projects all over the world.

G3600 | Sealing tape

The combination of AntiDUST® G3600 and our breather tapes give you the best benefits in protecting your multiwall sheet against dust, moss, insects and algae.

ClickFit | Tape system

Our ClickFit tape system offers an individually tailored die-cut breather and sealing tape with all the excellent features of the 4500, 3500 and 3600 series.

Industrial | Expedition

Applications **AntiDUST®** tape

The original AntiDUST® tape by Multifoil is the no.1 tape system for the polycarbonate multiwall market. For more than 30 years AntiDUST® tape by Multifoil is the standard in many projects all over the world.

Utilities | stadiums, hospitals, train stations, airports, swimming pools and commercial centres.

Industry | factories, greenhouses, warehouses, and plants.

Consumer | conservatories, carports, canopies, and verandas.

Packaging *Possibilities*

Blister

Specially for the DIY market, we have designed a quality blister packaging which can be customized with your logo and/or barcode. Easy and recognizable quality of AntiDUST® tape.

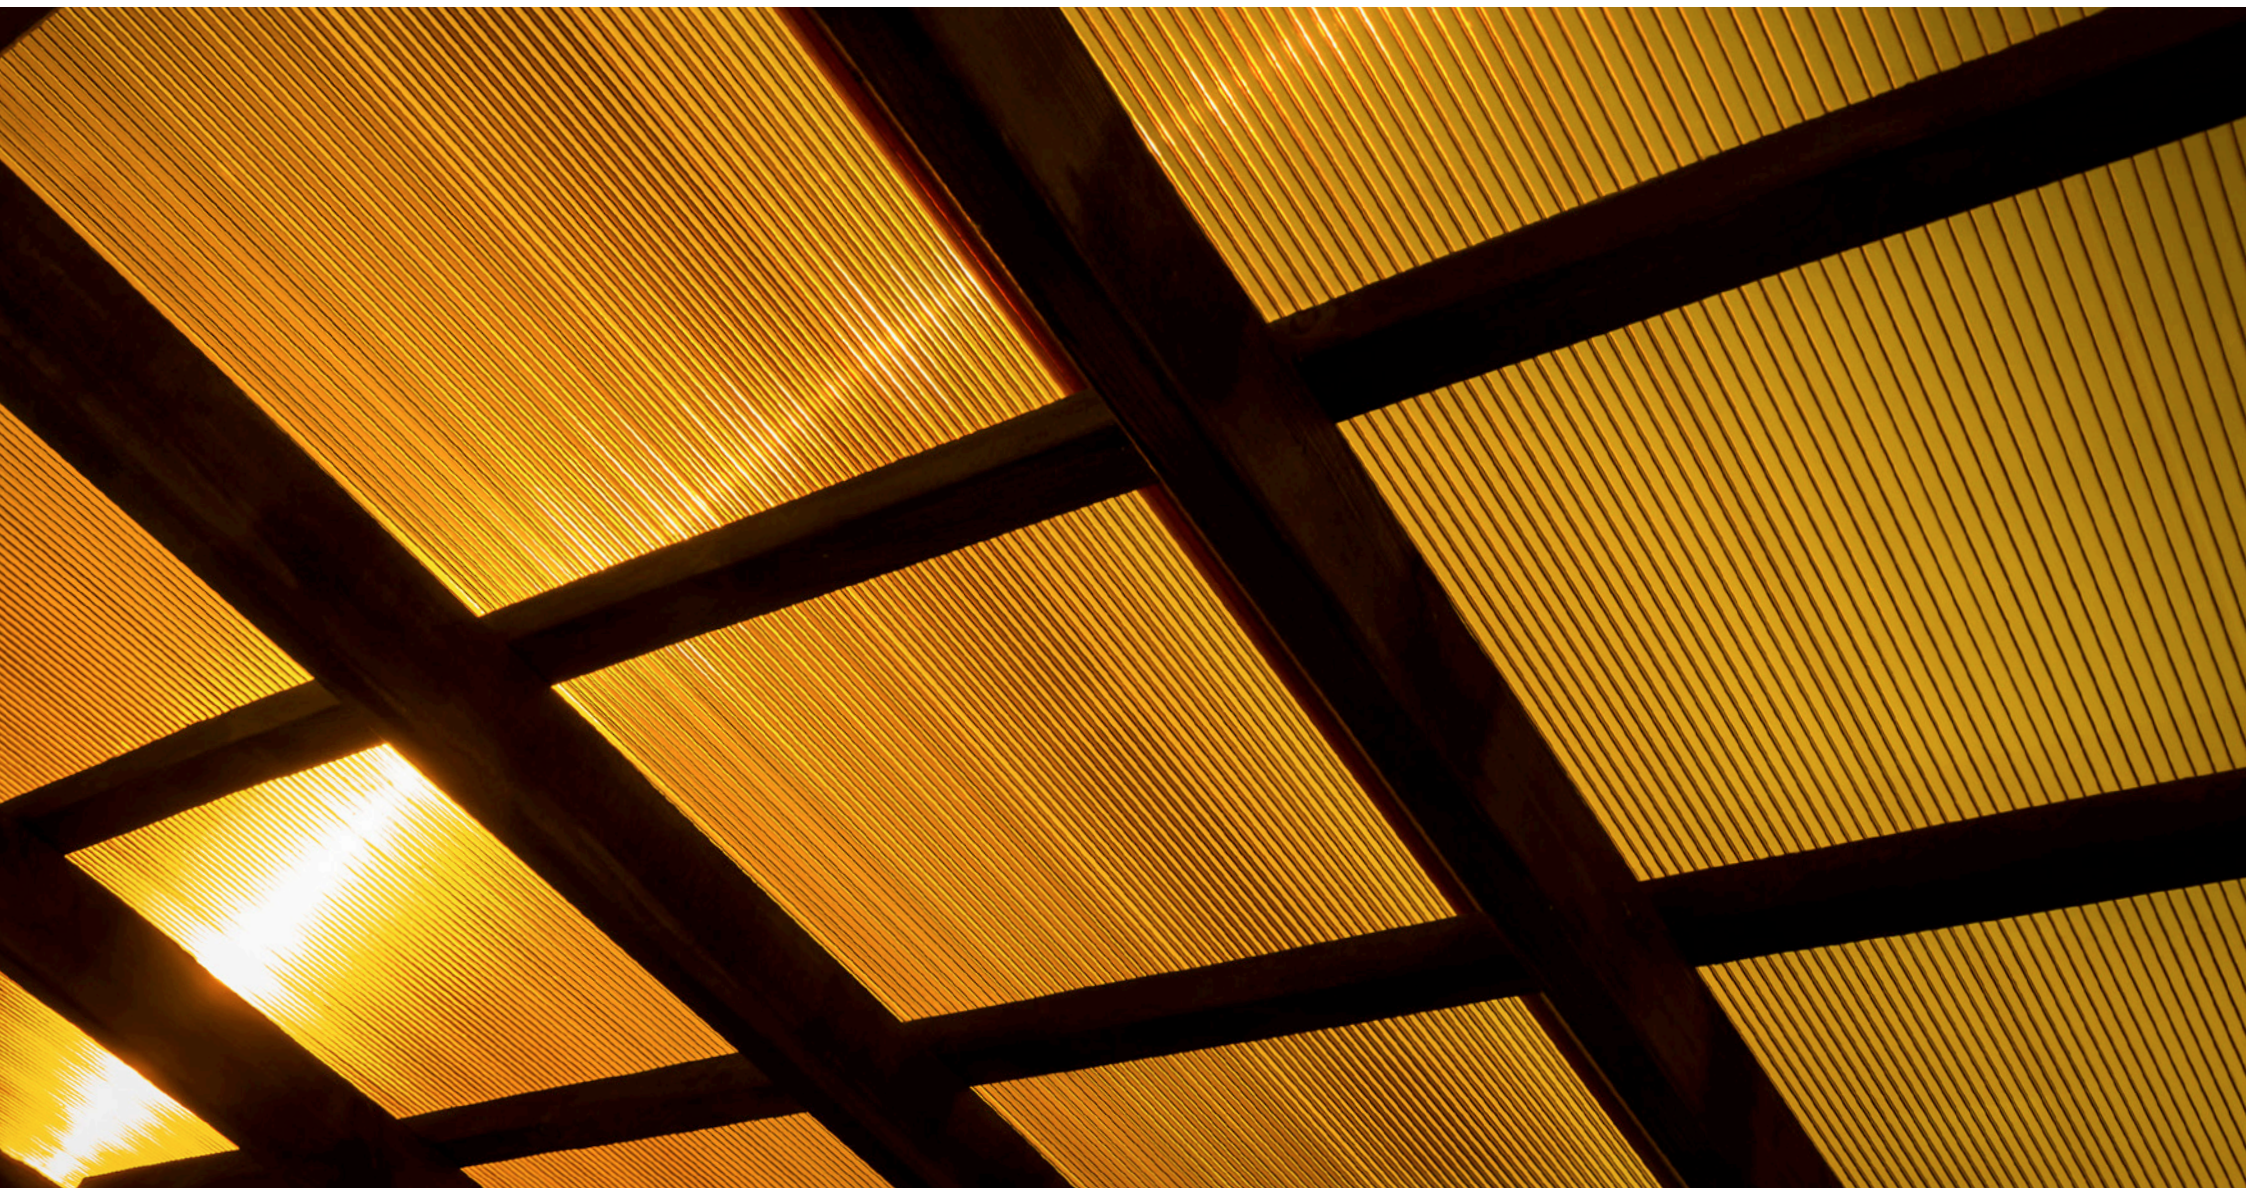

Top card

As a second option, we also deliver our AntiDUST® tapes packed with a Topcard. The Topcard can be customized with your logo and/or barcode.

Box

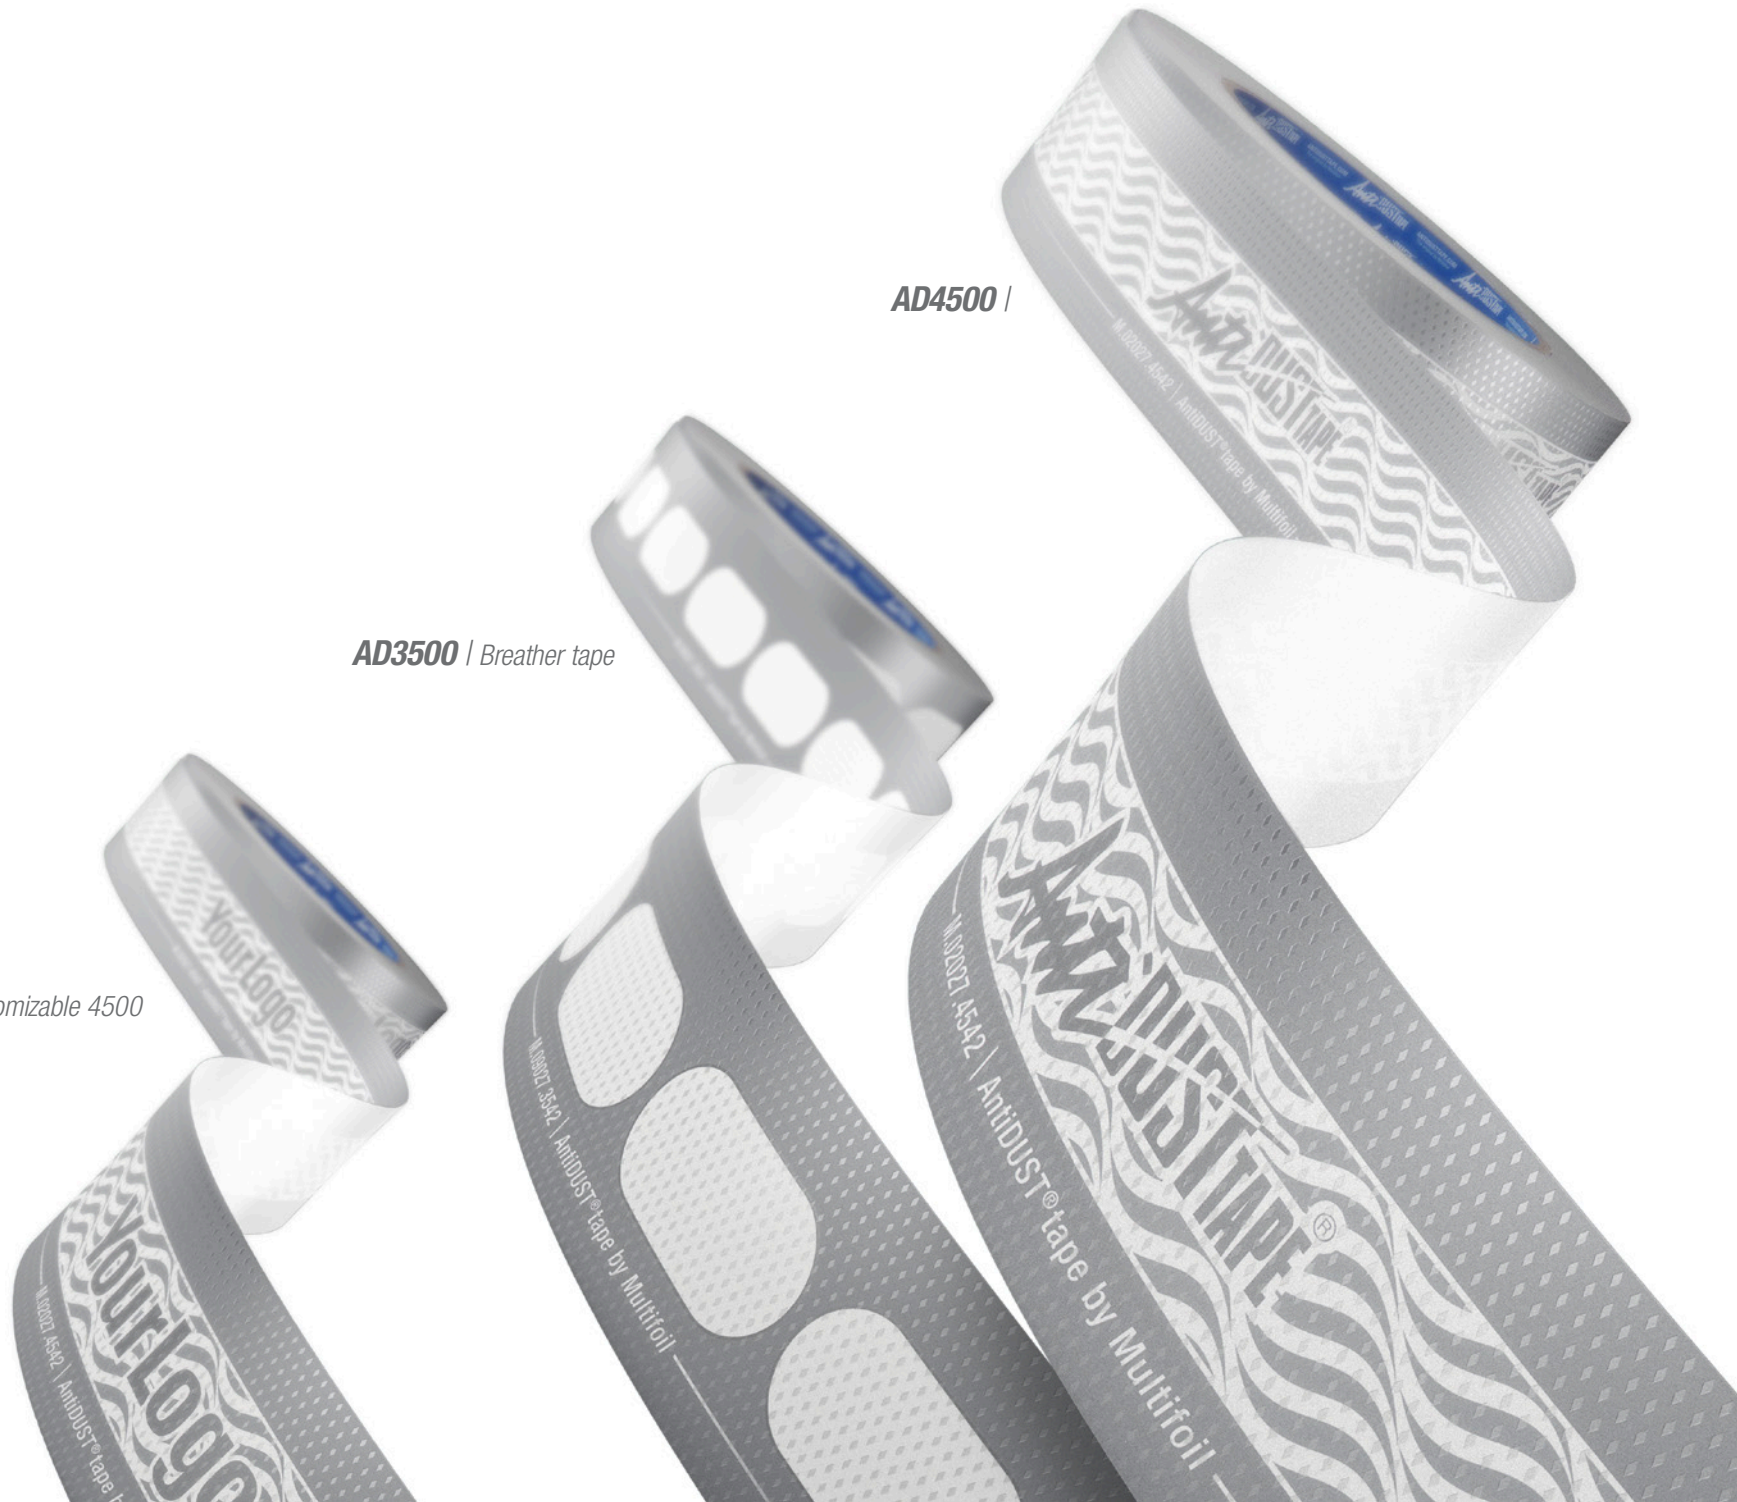

We have different sizes of quality boxes with the original logo of AntiDUST® tape on it. This represents the quality in product, production and packaging of Multifoi!

Multifoil

Multifoil is a Dutch manufacturer and the inventor of AntiDUST® tape. A clean and clear polycarbonate sheet is something we take very seriously at Multifoil, it is our main goal!

We've always been at the forefront of the development of a breather tape system for the polycarbonate sheet market. We innovate, test, and manufacture the AntiDUST® tapes from our (production) site in Vianen, The Netherlands. This way we can ensure the quality of our products and keep our promise to you.

AntiDUST® tape by Multifoil is the only system that ensures the clarity of your multiwall sheets from day 1 up to 10 years!
